

Driver Name \_\_\_\_\_

GENDER  MALE  FEMALE

HEIGHT(cm)

WEIGHT(kg)

Please wearing the underwear and using a cloth measuring tape to find appropriate fit. We would advise that you tie a band around your waist naturally. The reference point is at the navel. Have another person measure you. Do NOT use your clothing size for your measurements. Do NOT increase or subtract to measurements. Any adjustments or modifications due to incorrect measurements will be at the cost of the client.

### A Neck Circumference

Neck circumference around Adam's apple.

### B Chest Circumference

The widest part of the chest horizontally, under armpits with arms at your side.

### Chest Circ. on Woman

The widest part around your breast. The point right below your breast where the bra usually rests.

### C Cross-Chest Width

The length between armpits in the front with arms at your side.

### D Waist Circumference

Waist circ. at belly button level with a relaxed stomach. Make sure the tape is horizontally.

### E Hip Circumference

The widest hip point horizontally. The length between the widest hip point and belly button.

### F Leg Circumference

The largest circ. of thigh, usually below the hips. The largest circ. of knee, calf, ankle. The height of knee.

### G Arm Circumference

The arm hole at shoulder point, passing the armpit. The widest parts of bicep, elbow, forearm.

### H Sleeve Length

From the shoulder bone ends, run the tape to the elbow, down to the wrist bone.

### I Shoulder Width

From the shoulder bone ends, across the back neck point and end at the other shoulder bone.

### J Cross-Back Width

The length between armpits in the back with arms at your side.

### K Front Body Length

From the Side Neck Point through the highest point of the breast to waistline (belly button).

### L Rear Body Length

From the lower vertebrae of the back neck, follow the curve of the back to waistline (belly button).

### N Internal Leg Length

From highest point of crotch (perineum) down to ankle bone. Make sure the tape is close to the body.

### O Crotch Length

Press the tape on the navel, measure crotch length from the navel, following the crotch contour (perineum), to the back waistline.

### P Crotch Depth

Take a seat, measure the length between the waistline (belly button) and the seat surface.
